

PFAS-POU Filtration System

The WH-NS Multi-Purpose Cartridge System is again available for purchase, but with a new name that more accurately represents its purpose. Introducing the PFAS-POU Filtration System and Cartridge! The filter is NSF-certified to Standard 42 for reduction of chlorine, chloramine, taste & odor, particulate class 1. The cartridge also conforms to Standard 53 for reduction of PFOS and PFOA, two of the most common PFAS chemicals. The pricing remains unchanged. This filter is best suited for point-of-use installation. It is NSF-rated for Chlorine/Chloramine/ PFAS/PFOA removal up to 2,000 gallons at 2.8 gpm.

System Features & Benefits

- Quick-Change Cartridge
- Economical Operation
- Improves Taste & Odor
